

'Is it all in the mind? - Mental Health through the Ages' Issues for adolescents and young adults

Mental ill health will effect 1 in 4 of us at some point in our lives. Conditions include depression, schizophrenia, anxiety, obsession, alcohol/drug addiction, eating disorders and many others. The effects on a patient's quality of life can be profound.

Oral health contributes to general health, personal self esteem and quality of life. There is therefore a great need to address the effects of mental illness on an individual's oral health and their ability to receive appropriate care.

The conference will explore the subject of mental illness amongst adolescents and young adults, including mental health awareness, specific conditions relevant to this age group and the issues of oral health care management in this vulnerable patient group.

Closing date for applications:

Friday 16th November, 2007

Late applications will incur an extra **£20 fee**

This meeting will attract 5 credits for CPE
